---

I am all for cleaning the delta making the water more clean. But why should that fall on the citizens of Sacramento, Ca. Why are you suggesting raising our water bills, I don't agree with the plan to have the people pay more I don't agree with this because your going to continue to raise the water bills to pay for this they're will not be a limit and people won't be able to pay their water bill. It's your job to figure out the best way to deal with this problem.

Sincerely  
Jessica
